Use of Internet with Public authorities indicators:

- **Good – Fair – Moderate – Insufficient**

eGov services to business and citizens

- **New online service for personal income tax declaration:** This service reduces the time needed for citizens to fill online forms, as they need to upload their information online only once.
- **Launch of the Company Gate:** It permits to businesses and the government to interact through this authentic official digital post service.
- **Electronic Health Cooperation Service Space (EESZT):** It enables sectorial information systems and health professionals to work together.

Strategy & Legal frameworks

- **eAdministration Act (once only principle)**
- **eProcurement system**
- **Decree 39/2016 eHealth services is compulsory**

Actors

- **Deputy State Secretary for Registries’ Management of the Ministry of Interior** replaced the Central Office for Administrative and Electronic Public Services (KEKKH).
- **IT infrastructure management and delivery of eGovernment services are now the tasks of the National Infocommunications Service Provider Ltd.**

Infrastructure

- **The new Public Sector Information portal:** It is expected to be launched later in 2018.
- **Countrywide expansion of municipality ASP 2.0 project:** It provides modern, integrated and cost-effective state of the art IT solutions for local governments based on the application service provider’s central infrastructure. More than 93% of the Hungarian local municipalities are using the same centrally managed software.

Check out the [NIFO collection](#) on Joinup for more details.

NIFO is a project service provided by the European Commission’s ISA² programme. It delivers solutions for European public administrations, citizens and businesses. It assists EU countries in monitoring the take up of eGovernment and interoperability.
